### EMPLOYMENT HISTORY

---

**Informatica India Pvt. Limited**, Hyderabad

Aug 2012 - Present

**LDM Admin**

- At present working on ldm admin to go over the performance issues raised by customers and involved in designing part of ldm admin to move to new internal framework droplets.

**Enterprise Data Catalog**

- Worked on Search component of catalog UI. Revamp the search UI and created a new tab-based search page so that it will be useful for user to use and improved lot of performance issues. Responsible for Application Configuration page to have proper handshaking of custom/system attribute with MRS and search repository. Handled many customer issues and enhancements specific to customers.

**Secure@Source**

- Secure@Source is an audit and compliance application that is designed to help organizations discover where sensitive data resides, how well the data is protected and how it is proliferated. It gives user the complete idea of distribution of data and cost of sensitive data. Developed multiple workspaces and handled many POCs and customer issues.

**UI Development ILM Products**

- Information Life Cycle Management (ILM) is a Informatica product that empowers IT organization to cost-effectively handle data growth, safely retire legacy systems and applications, optimize test data management, and protect sensitive data. ILM is a group of products like Data Archive, Test Data Management and Smart Partitioning. Current role involves developing UI for all these products and maintaining uniform UI throughout the ILM suite.

### AWARDS

---

- Received multiple applauses for revamping of search UI in EDC year 2019.
- Won award from senior director for implementing condition builder year 2017.
